

Procurement of portable desalinators for two fishing vessels as a pilot project

Acquisition of two portable desalinators, which produce 30 litres of fresh, potable water per hour, to be incorporated on board two fishing vessels to test and evaluate their viability in reducing water consumption.

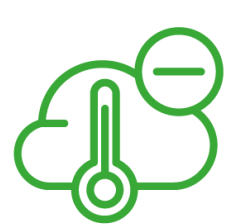

Improvement of water management through the collection of seawater for cleaning and consumption.

Promoting environmentally sustainable systems in fishing activities

Climate risks addressed:

Water scarcity for tourist consumption

Loss of climatic comfort for the tourism sector

Start date: 01/08/2024
