

Environmental fallowing

Specific studies and monitoring of endangered steppe birds and small invertebrates in the Plana de Secà, located in the Alt Camp region, and implementation of pilot tests of environmental fallow and adequacy of pasture routes.

We promote agro-livestock farming practices that are respectful of biodiversity and sustainable in the long term.

We improve soil health by increasing the organic carbon pool.

Climate risks addressed:

Loss of soil quality

Changes in the distribution of agricultural species and alteration of crop cycles

Start date: 19/08/2024

Lead partner: Consorci Leader de Desenvolupament Rural del Camp

Location: Comarca de l'Alt Camp

Budget: 13.552,00 €

Co-creating strategic action to adapt territories and the local economy to climate change
