

Municipal woodsheds

Installation of 5 woodsheds of 120 cm x 120 cm for drying firewood from the remains of forest harvesting carried out in the municipality. This ensures that homes in the urban area that do not have space to dry firewood can do so and thus promote forest cleanliness and forest management.

Contributing to fire prevention

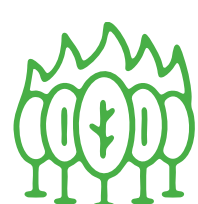

Making the forest resilient to climate change

Promoting the consumption of local and proximity biomass

Facilitating the storage of timber and/or firewood by citizens for their own use

Promoting active and responsible citizen management of forests

Climate risks addressed:

Increased risk of forest fires

Start date: 03/06/2024
