

Ratapatxets (bats)

Survey and monitoring of bats and their roosts in the Tarragona area, in order to better understand their ecology, identify possible threats and design conservation strategies adapted to the specific needs of the species, especially in the context of climate change

We value the ecological contributions of bats in the forestry and agricultural sectors

We raise awareness

We involve and raise awareness among stakeholders and citizens

Climate risks addressed:

 Changes in the distribution of agricultural species and alteration of crop cycles

Start date: 14/08/2024

Lead partner: Consorci Leader de Desenvolupament Rural del Camp

Collaborating entities: GEPEC-EdC, Museu de Ciències Naturals de Granollers

Location: Camp de Tarragona

Budget: 13.310,00 €
